Dear Mr. Frolov,

I discovered your address in the SPACE ENERGY JOURNAL (formerly edited by Don Kelly) and suppose that you are interested in all clean energy research and development activities.

Enclosed you find our information flyer and the latest issue of our Newsletter which I provide to you for no costs to initiate this kind of advanced thinking in your country as well. Even in my country the theme is not mainstream but the more people are longing for new concepts the more politicians will finally support a well funded research for these new clean technologies.

I would greatly appreciate if you would become a subscriber or a member and hearing of you soon.

Hints from the FREE ENERGY scene and related fields are welcome. Informations of general interest may be selected for publication in one of the next issues.

best regards

WOLFRAM BAHMANN

Dear Mr. Frolov,

many thanks for your open letter of April 4.

I do understand your problems to become a PACE member at this time. Even if I cannot provide you free Newsletter exemplars on the long run, I enclose the latest issues for no cost to support your own work.

It would be kind if you can distribute the information of P.A.C.E. among other interested people if possible.

As you I am also in contact with Don Kelly and Hal Fox and wish that the latter is able to organize some support for you.

Myself I will have the occasion to attend the '94 symposium of the Institute for New Energy and will met both in Denver. I hope to get new informations about free energy hardware from there.

Concerning your draft paper on ELECTROGRAVITATION : because I am not an expert on this matter (I am meteorologist and geoscientist, 40 yr. of age; interests: water decomposition with over unity) I suggest your agreement to forward it to people working on this theme for peer-reviewing.

Thank you again and I wish you and your country all the best for the future. Probably we will hear of each other again on continuing the free energy research work. ... good luck !

Best Regards,

WOLFRAM BAHMANN

Dear Mr. Frolov,

many thanks for your recent phone conversation.

As promised I send you some of the papers of the American physicist Harold Puthoff, a pioneer in the zero-point -energy research.

Please find also a conference announcement where he is the main speaker.

Yours Sincerely,
